

## English

Our English will be based around two different texts this term: *The Viewer* by Gary Crew and *The Adventures of Odysseus* by Hugh Lupton and Daniel Morden. The books are based around our topic of Ancient Greece and will help to tie all of our learning together.

We will be writing stories concentrating on both dialogue and atmosphere. Playscripts, poems and debates will also stem from these texts. The children will also be learning more about spelling, punctuation and grammar.

## Science

The first topic we will be looking at is living things and their habitats - looking at all the different habitats around the world and the life forms they support.

Our final project will be around climate change and will be cross curricular with our learning in geography.

## Maths

In Maths we will be honing our skills in arithmetic. We will be spending time on geometry: using protractors, calculating angles and exploring shape.

The children will be finding more out about algebra and how it is used in the real world. We will also be taking part in some exciting budgeting. Where we become homeowners and learn about all the financial stresses and strains that our parents and carers have to contend with.

# Endeavour – Summer 2023

## Computing

The children will be learning to use spreadsheets and databases. They will then undertake some cross curricular projects - using computers to present.

## RE

This term we will be learning about the Hindu faith. Discovering what Hindus believe and how they express their faith and make sense of the world.

Another busy term awaits the children in Endeavour class. For yr 6, we are only a few short weeks away from SATs tests (9<sup>th</sup> - 12<sup>th</sup> May). Please reassure the children that they are now well prepared, that the tests don't matter enough to worry about them and to mainly look forward to their SATs breakfasts! For yr 5, they will have a lovely time back in Victory for the 4 mornings of the tests and it will all soon be back to normal. There is still lots of exciting learning to be done this year and I know that all the children have already progressed.

## Geography and History

This term we will be finding out about Ancient Greece. Discovering about the origins of the Olympic games, democracy, their belief in Gods and the impact of this civilisation on the rest of Europe. Our Geography will be based around maps and understanding how we can help the world environment.

## Music

The Summer term will herald us using our singing voices to greater effect. Learning to create beautiful music with our vocal cords.

## Art and DT

During the term we will be using our DT skills to upcycle household objects and evaluating our final pieces. In art we will be using our modelling skills in various ways.

## PE

As the weather improves, the children will be playing tennis and partaking in outdoor and adventurous pursuits. Please make sure that the children have their PE kits (including trainers) in school for these days.

## PSHE

Our PSHE will be about making choices - such an important part of growing. We will be looking at our sex education information for the year and addressing FMG and pornography.
