

English

We will be reading *The Viewer* and *The Adventures of Odysseus* which will be the stimulus for our written work this term. We would encourage the children to read a variety of texts each day at home, even just for 5 minutes.

Science

We will be learning about living things and their habitats. After the May break we will be thinking about all things environmental.

Maths

In maths we will be learning about shape, space and measurement. We will also think about statistics and how to interpret data. We continue to build fluency, by using manipulatives alongside pictorial representations in order to deepen understanding. It is vital we continue to practise our times tables as they are linked to so many areas of maths and regular practise will also help to improve confidence and fluency in preparation for those children multiplication test in June.

Owls

Computing

We will be learning how to create and use spreadsheets and databases.

RE

What do Hindus believe?

How do they express their faith?

We hope you enjoyed a restful Easter break and welcome you back as we begin the summer term. We are hopeful that the weather will keep improving and the sun will shine on all of us. We would like to welcome you all to join us for Collective Worship each Friday afternoon at 2.45pm. Please do come along and join us in celebrating our learning for the week.

Humanities

We will be thinking about Ancient Greek culture and society. Our learning will include using sources to find out about life at the time. We will think about the Olympics, Sparta, Warfare, Men, Women, Gods and Goddesses.

Music

Warm up those vocal chords as we'll be doing a lot of singing this term. We will be learning about rhythm, group singing and chord changes.

Art

We will be making Amphora pots in art which links to our learning about the Ancient Greek period. What were they for? What did they depict?

PE

Anyone for tennis? This term we will be developing our tennis skills in preparation for Wimbledon. Bring on the strawberries and cream.

PSHE

We will be learning how to make sensible choices about what we watch and play. We will also be developing our understanding of relationships and sex education.

We will be using maps, atlases and globes and thinking about human and physical features.
